Matrices in R

```
# Similar to data.frame(RxC) and also similar to Vector  
# Matrix - Element by element operations are possible
```

```
A = matrix(1:10, nrow=5) # Create a 5x2 matrix  
A
```

```
##      [,1] [,2]  
## [1,]    1    6  
## [2,]    2    7  
## [3,]    3    8  
## [4,]    4    9  
## [5,]    5   10
```
